Disclaimer

This service is by no means 100% safe. If this scanner says 'OK', it does not necessarily mean the file is clean. There could be a whole new virus on the loose. **NEVER** rely on one single product only, not even this service, even though it utilizes several products. Therefore, We cannot and will not be held responsible for any damage caused by results presented by this non-profit online service.

Scanning can take a while, since several scanners are being used, plus the fact some scanners use very high levels of (time consuming) heuristics. Scanners used are Linux versions, differences with Windows scanners may or may not occur. Some scanners will only report one virus when scanning archives with multiple pieces of malware.

Virus definitions are updated every hour. There is a 10Mb limit per file. Please refrain from uploading tons of hex-edited or repacked variants of the same sample.

Please do not ask for viruses uploaded here, unless you work for an anti-virus vendor. They are not for trade. This is a legitimate service, not a VX site. Viruses uploaded here will be distributed to antivirus vendors without exception. Read more about this in our [privacy policy](#). If you do not want your files to be distributed, please do not send them at all.
