Warnings

Microsoft Exchange Agent Warning

You must run a separate installation procedure if you want to continuously back up Exchange transaction logs with the Backup Exec Continuous Protection Server. You must install the CPS Continuous Protection Agent and the CPS Exchange Protection Agent on the media server and on the Exchange Server. You can install both of the CPS Agents from the CPS Administration Console.

About Backing Up Exchange 2007 Servers

To back up Microsoft Exchange Server 2007, you must install the Exchange Management Tools for Microsoft Exchange Server 2007 on this computer. The Management Tools can be installed during a custom install of Microsoft Exchange Server 2007. To support individual mailbox message and folder restores from Information Store backups, you must also download and install the Microsoft Exchange Server MAPI Client and Collaboration Data Objects package version 06.05.7888 or later on the Exchange 2007 server. This package can be found on the Microsoft Web site.
