

ASUS P5PE-VM Technical Updates

1.10.2 Internal connectors

6. Front panel audio connector (10-1 pin FP_AUDIO)

This connector is for a chassis-mounted front panel audio I/O module that supports legacy AC '97 audio standard. Connect one end of the front panel audio I/O module cable to this connector.

Due to chipset limitation, the system may be unstable to run at FSB 1066MHz when applying the embedded GPU.
